MINING, BUSINESS AND STOCKS.

WILL CONSTRUCT TWO MILLS IN LA SALS

Joseph H. Webb Declares Operations At Wilson Mesa This Year Will Be by Milling Ores.

Mesa, Jan. 19.-While the Grand river country is having its oil and gas boom, Moab is organizing its board of trade, with good prospects of a boat line in the near future, just keep an eye on the old La Sals and especially the mesa. We have no big oil or gas wells, nor big transportation schemes; but there will be something doing next season just the same. For we have plenty of the yellow metal and arrangements are now perfected whereby some of it will be extracted next year. Two mills

here next spring are now assured and indications are good for more.

The prospecting stage has been passed on the mesa and from now on mining will be done. The work of the past season, theroughly demonstrated. season thoroughly demonstrated that the ore and gold here are of geyser origin, following the faults of porphyritic shale and conglomerate sandstone. It has also been discovered that the amythist quartz is not the only rock amythist quartz is not the only rock here that carries good values. Nearly all of the altered cruptive rocks that fill the throat of the geysers, such as green hornblende, feld spar, porphyry and dolerite, all carry good values in gold and the large bodies of talc and kaolin have values that will pay to mill.

EXTINCT GEYSERS.

When the fact is taken into consideration that there are numerous places, here, where the faulting is plainly traceable and the outcropping of the now extinct geysers show; and that at all of these places good values in gold are found on the surface, one can readily see what will happen when the dopping of the stamps demonstrates to to the mining world what we have here.

here.

Heretofore the work on the mesa has been confined to placer mining, and good results have been obtained. The operators, however, early learned that they were losing a large per cent of the values in the fine gravel that was only partly disintegrated. By a more thorough test made in last season's operations the rather startling discovery was made that for every ounce of free gold saved, 10 ounces were lost in the gravel and rock. All this could have been saved by milling.

Three other factors tend to work against the economical operation of placer mining here. These are, that the trend of the gravel soon dips below the level at which hydraulic mining can profitably be done; the scarcity of water for extensive hydraulic mining; and a large amount of big rock encountered, which requires blasting.

The coarse rock would be no detriment to the milling process as nearly all of the coarse rock as well as the fine gravel carries values that would pay to mill. Heretofore the work on the mesa ha

IN OTHER CAMPS.

Wilson Mesa does not stand alone as a prospective producer for 1910. The neighboring camps of Beaver and Miner's basin bid fair to soon take their places among the best camps in the West. Few camps have larger bodies of medium grade ore and none have a more determined resolute class of miners. In spite of all obstacles, they have persistently pounded away until today they have many good mines, lacking machinery only to treat the ore. As the machinery is forthcoming.

lacking machinery only to ore. As the machinery is forthcoming.

The writer recently received a letter from the Denver Quartz Mill company, wherein they stated that a party at Beaver basin, Grand county, had just ordered a 50-ton mill to be installed early in the spring of 1910.

While there is an immense amount of medium grade ore in Miner's and Beaver basins, there is also some ore of very high grade. The writer was shown numerous samples last year, taken from the Tornado and other mines of that district, that would class as high grade, even in Cripple Creek or Goldfield.

JOSEPH H. WEBB.

SIOUX MAKES BIG JUMP.

Are Caught and Prices Bound Upward on Exchange.

catching of the shorts on the local mining exchange this morning sent Sioux bounding upward and easily furnished the feature of the market today. From 33½ cents at the open-ing, Sioux swiftly reached 40 cents this again to 36 cents. As soon as the price began moving up the shorts hurried to cover, which only rushed prices further up the scale. As soon as the brokpers had the situation better in hand they began to regulate matters with the result that the stock gradually dropped down again During the session 31,700 shares of stock changed hands.

sion 31,700 shares of stock changed hands.

Colorado was about the same today and sold around 75 and 76 cents. Columbus Consolidated was still weak and falled to reach the dollar mark. Iron Blossom was stronger and Mason Valley was steadier with heavier buying. Tintic Combination showed considerable activity today. Just a year ago this stock began to soar upward in the same manner as it did today. It maintained its position for several months and then started down. Today 25,000 shares of the stock changed hands at 4, 44, 4½ and 4½ cents.

The total number of shares disposed of this morning was \$3,250 and the amount represented by the transactions was \$37,056.25. This is the highest record so far for the year 1910. It is more

EAST TINTIC IN VEIN MATTER. Lowest Level at Development Has Good Signs.

Good Signs.

At the East Tintic Development mine the drift toward the east on the 500-level is now in a distance of 170 feet and the entire face of the drift is in vein matter. According to Manager Ralph Kellogs the indications for encountering ore at this level could not be more favorable and a strike is liable to be announced at any time. As much depends on the opening of ore at this depth such a strike would be a very important one. This week two carloads of ore will be sent out of this mine.

JARBRIDGE CAMP IN **WONDERFUL COUNTRY**

Snow-Capped Peaks the Year Round, Much Water, Timber, Many Fish and Small Lakes at High Altitude.

"Do you know that Jarbridge is a wonderful country?" said an old mining man who succeeded in getting out of that snowbound canyon about 10 days ago. "'Jarbridge' is the name for

that snowbound canyon about 10 days ago. "Jarbridge' is the name for devil," he continued, "and the legend goes that an army of good spirits gave chase to his satanic majesty, and after driving him from one end of the country to the other, he at last took refuge in these fastnesses of the mountains, where he made a stand, holding his pursuers at bay.

"Here the ever snowcapped peaks prick the blue sky at an altitude of at least 12,000 feet. The place is surrounded with extinct craters, some of which form small lakes. One of these lakes, probably half a mile across and of unknown depth, stands there today at an altitude of 10,000 feet above sea level. In it you may see myriads of beautiful fish, some almost as red as fire. The iron so prevalent on the rocky shores of the lake may have something to do with this high coloring of the finny tribe found up above the clouds. "The narrow valleys are plentifully supplied with water, and the higher hills are covered with spruce, some of considerable size. Small groves of quaking asp and other soft wood trees are found in the lower valleys. There seems to be ample timber for mining purposes, and there is no end of cool, pure water for camp and milling purposes, and there is no end of cool, pure water for camp and milling purposes. The place impresses me as a second Cripple Creek.
"It is an ideal place for summer. Cool, refreshing streams pour down from the snowcapped peaks and the grass always look fresh and green. Undoubtedly there will be found there has dreamed. The fine mill site, the rich ore and a fine country to live in.

LONG SEARCHED FOR.

IONG SEARCHED FOR.

"D. A. Bourne the discoverer of the district declares it one of the long lost mines. A quarter of a century ago a driver in the employ of Scott & Hanks, a stage outfit, picked up some of the ore and turned it over to his employer, who had it assayed. When he sent for the driver he had left his employ and could not be found. Fifteen years later a camptender in the employ of John Pence found a piece of the rich rock, which assayed \$\frac{4}{3}\$,800. It was several weeks after it was found that the assay was made. Paralysis in the meantime had put a lock on the man's speech. "Indians fear the region and not one of them will enter that rugged country. From the outside it looks like the remnants of the building of the world, but within it is positively beautiful. "Many prospectors have gone in search of the hidden treasure there and never returned. They probably starved or were killed by the Indians. Last fall a skeleton was found on property now belonging to Mr. Bourne and now called Dead Man's Flat. Near by was a mortar and an old hovel. It is quite vident that someone knew of these riches but never returned to tell his story."

PUSHING DEVELOPMENT.

Early in Spring.

Early in Spring.

Judging from the extensive development work now being done, the amount of good milling ore on the dumps and the rich average samples recently received from the property, the Revenue Consolidated Mining company's property, located 18 miles west of Newhouse in the Pine Grove mining district, Beaver county, will early in 1910 prove itself one of the good ones. The property embraces a vast domain of upwards of 1,200 acres, including 30 patented and 30 unpatented claims. The formation is made up of beds of lime and quartitie, cut by porphyry dikes. The values are in lead and silver. The main workings on the property consist of the Cliff tunnel, 550 feet long: the Milli tunnel, 300 feet, and a 250 foot shaft.

At present active work is going on in the Cliff tunnel, where if the present

of the Cliff tunnel, 559 feet long: the Mill tunnel, 300 feet, and a 250 foot shaft.

At present active work is going on in the Cliff tunnel, where, if the present satisfactory progress continues for another 30 days, the men will tap the 250 foot shaft that has been sunk on the leading vein of the property. This accomplished, stoping the ore will be inaugurated with over 100 feet of the vein, three to six feet wide, to work on, a fair average sample across the vein showing values of \$40 to \$50 to the ton. The anticipated completion of the 300 foot Mill turnel this summer will afford over 200 feet of good stoping ore in another place on the property.

All the dumps show considerable rich ore with values of 100 ounces silver and 50 per cent lead, while assays of 200 ounces silver and 50 per cent lead, while assays of 200 ounces silver and 75 per cent lead are not uncommon. Nearly the entire dumps are made up of good milling ore. Last fall the company completed a good road to Newhouse, the closest railroad point, after several years of intermittent work. The intention is to send in several carloads of rich ore early this spring. They will be taken from the present dumps.

Among those interested in the Revenue Consolidated are L. G. Burton, manager, L. S. Hills, secretary; C. S. Burton, A. K. Tiernan, Governor William Spry, Thomas Hull, Attorney E. Blerer, Henry McEwan and Heber Harker.

CONCENTRATES

E. J. Raddatz leaves today for Mil-wankee and other middle west cities in the interest of Tintic Standard.

Boise, Ida., Jan. 18.-The mineral production of Idaho for 1909 is officially given at \$15,660,000, an increase of a million and a quarter over 1908.

The drift on the 700-foot level of the Tintic Standard property in East Tin-Tintle Standard property in East Tin-tle is still in quartz. The drift will have to be run about 152 feet more to get under the heavy lead ore which was encountered in a leached condition on the 400-foot level. As soon as this is reached it is believed that a large mine will be opened up.

Some decidedly interesting developments are now being made at the Ely Centennial mine at Ely. The tunnel is in a distance of 275 feet and has encountered the vein matter in the second ledge. The quartz that is now being taken out shows great quantities of iron and copper stains, which is apparently at the extreme edge of the vein.

The mines at Pioche will be without transportation facilities only long enough for the 21 miles of cut-off to be built to the camp Such is declared to have been the assurance of the Salt Lake Route people to the Pioche mine operators. The road will run from Uvada to the Callente-Pioche branch and will be the quickest means of the company getting out its rolling stock.

company getting out its rolling stock. Word has been received from Ely that General Manager D. C. McDonald is making preparations for opening up work at the McDonald-Ely property in which a number of Salt Lake capitalists are interested. Manager McDonald has not set a date for resuming the work but declares that it will be shortly. The McDonald-Ely is one of the most promising things in the Robinson mining district. The old Robus mill on the property could quickly be remodiced and put in order to treat any of the low grade copper ores in the property.

erty.

Exploratory work at the Tintic Delmar property in North Tintic is bringing out some excellent showings and it is not improbable that a mine will be made by the time the tunnel cuts the veln, which is now about 25 feet ahead of the face of the tunnel. The tunnel is now in 200 feet. When the tunnel was no a distance of 150 feet a small cave was encountered. In it a sample was picked which gave returns of 150 ounces in silver and \$190 in gold. Another streak of quartz was cut at 137 feet. This showed values of 156.3 ounces in silver, 4.85 per cent lead and \$5.18 in silver, 4.85 per cent lead and \$5.18 in silver. The face of the tunnel at 200 feet showed 5 per cent lead, 1.35 ounces in silver and \$1.20 in gold.

MARKET CLOSED **FURIOUSLY ACTIVE**

New York, Jan. 19.-The opening reound in prices of stocks today was quite yiolent, especially in those stocks which were most depressed yesterday. Louisville & Nashville was run up 24. Louisville & Nashville was run up 2½,
Northern Pacific 1½, Southern Pacific
and Canadian Pacific 1½, Great Northern preferred, Rock Island, Baitimore
& Ohio and Amalgamated Copper 1,
and St. Paul, Reading, Western Maryland and American Smelting large fractions.
There was a sprinkling of declines which ran to large fractions.
Great Northern preferred and Northern Pacific lost their gains immediately
after the opening.

The pressure against the Hill stocks
was abandoned for a time and they got
back to their high figures. Later wholesale liquidation in the InterboroughMetropolitan stocks which cost the
common 2½ and the preferred 2½
caused a general reaction which ran
to a point in many of the prominent
stocks. Chicago Great Western, Western Maryland certificates and Pullman
declined 1.

A lively selling movement carried

ern Maryland certificates and Pullman declined 1.

A lively selling movement carried prices below yesterday's level throughout the list. Heavy liquidation in the Interborough-Metropolitan stocks and the violent declines in Hocking Coal on sales of small lots were weakening factors. Hocking Coal tumbled 274, Interborough-Metropolitan, 345; the preferred, '; Soo Line, 445, and Reading & Chesapeake & Oho, Kansas & Texas, Republic Steel, United States Rubber and others, I. Bonds were irregular.

& Chesapeake & Ohio, Kansas & Texas, Republic Steel, United States Rubber and others, 1.

Bonds were irregular.

Prices broke all-round in sympathy with the collapse in Hocking Coal, which reached 53½ points. The average losses in the list run to between 1 and 2 points and in Interborough-Metropolitan amounted to 3%, the preferred falling, 5½ points. Pittsburg Coal fell 4, Chesapeake & Ohio, 3¼ and Westing-house Electric, 2½.

The selling had exhausted itself in the course of less than an hour and a violent rally ensued with a rush of shorts to cover. The losses in the general list were entirely wiped out by this rebound in some of the principal special stocks.

New York, Jan, 19.—The disorderly liquidation in Hocking Coal broke prices in the whole list. Declines ranged quite generally from 1 to 2 points and in Minneapolis, St Louis & Sault St. Marie and Pittsburg coal reached 4, the preferred 2½, Chesapeake & Ohio 3½ and Brooklyn Transit 2½. A rush of shorts to cover caused a violent rally during the noon hour but the announcement of a second stock exchange failure caused prices to run off again and left the tone very unsettled.

Hocking Coal sold as low as 25 compared with 57½, yesterday's final price, Liquidation was actively pursued throughout the list. Some of the notable declines were: American Express, 20; Central Raliroad of New Jersey, 8; Consolidated Gas, 7½; Chlosape, 5t. Paul. Minneapolis & Omaha, 5; Toledo, St. Louis & Western, preferred, 4%; Reading and Western Maryland certificates, 2½ and Laclede Gas, 2½.

Colorado Fuel preferred sold at an advance of 7.

The marget and the preferred sold at an advance of 7.

The marget and the preferred sold at an advance of 7.

Colorado Fuel preferred sold at an advance of 7.

The market closed furiously active and with a rally in progress. The bears centered their final attack on the more standard stocks and forced declines of between 2 and 3 points in Union Pacific, Southern Pacific, Atchison, Wabash preferred, New York Central, Atlantic Coast Line, Rock Island, United States Steel, Almagamated Copper, American Smelting, American Locomotive and others. Delaware & Hudson dropped four and Consolidated Gas 8½. Demand from the bears to cover shorts became very active at the decline and railled prices quite vigorously.

PRODUCE.

CHICAGO.

Chicago, Jan. 19.—Wheat continued on the down grade in the early trading here today and fell off at the opening serially from ½ to ½ below yesterday's final figures. Continued liberal may be supported by the weather conditions counterbalanced a slightly improved demand for eash gradn and gave support to the bearlsh sentiment which predominated in the pit. In the first hour prices moved over a range of from ½ to ½. The volume of trade was in the May delivery which opened at 1.68½ to 1.68¾, and on a slight rally touched 1.69, afterward dropping back to the opening figures.

General commission selling in the corn pit caused a falling off in prices

at the outset of generally from % to ½ below yesterday's closing prices. Excellent weather throughout the corn belt accelerated the movement of the country elevator stock, which of late has been delayed. The range in the first hour was about ¼, comparing practically within the opening figures, which for May were ½@ to ½@½ lower than yesterday's final figures at ½% to 6½. Oats reflected the course of word head orn, increased more of form being corn, increased more in the decline, which at the start ranged from ¼ to ½ lower than yesterday's closing prices. The first hour's trading was within the opening range. May opened at 6½ to 4½.

An easier tone in the hog market was reflected in provisions in lower prices, futures ranging at the start from unchanged to 2½ to 10c. lower than yesterday's close. January pork dropped 2½/c. at the start. Opening figures on May were; Pork, 21.75 to 21.70; lard, 12.00; ribs. 11.47½.

Wheat—The market was nervous throughout the first half of the session, the decline continuing uninterruptedly. During the final hour a rush of shorts to cover advanced prices above the opening figures. May went up to 1.09 after

Wheat—The market was nervous throughout the first half of the session, the decline continuing uninterruptedly. During the final hour a rush of shorts to cover advanced prices above the opening figures. May went up to 1.69 after having touched 1.07%. The close was strong, with May a shade lower than yesterday's final figures at 1.65% 61.09. Corn—The market declined for a tigue and later, in sympathy with the advance in wheat shot upward, closing unchanged to a shade higher than yesterday's final figures. May touched 61% after having declined to 65%. The close was strong, with May at 57% 67%. The close was strong, with May at 57% 76% 58; Liny, 67% 67%; Sapt. 38%; Close—Wheat—Jan. 1.097%; May, 1.08% 67%; Sept. 67%, 67%; Sept. 67%, 67%; Sept. 67%, 69%; 59t. 61%.

SPRING CITY. **EARLY CHURCH VETERAN CLOSES HONORED CAREER**

(Special Correspondence.) SPRING CITY, Sanpete Co., Jan. 17 SPRING CITY, Sanpete Co., and It.

-The funeral of Isaac M. Behunin was held in the ward meetinghouse today. The house was filled to its capacity by friends and relatives of the deceased. The speakers were Elders Martin Allred, of Fairview, Rasmus Justesen, Isaac M. Allred, Samuel Allred, John S. Blain and Bishop Lauritz O. Larsen.

red, of Fairview, Rasmus Justesen, Isaac M. Allred, Samuel Allred, John S. Blain and Bishop Lauritz O. Larsen.

The funeral was one of the largest that has been held in Spring City for a long time.

The deceased was born in Oswego county, New York, Sept. 9, 1831. His father joined the Church in 1833, and removed to Kirtland, O., the next year. From there the family went to Missouri, and thence to Nauvoo, Ill., passing through all the Church persecutions, incident to those early days. It was while living at Nauvoo that the deceased was baptized, the event occurring Sept. 12, 1839. He came to Utah in 1849, and located at Provo. In 1851, he moved to Ephraim, Sanpete county. He served as captain through the Walker and Black Hawk Indian wars. He took part in the Elk mountain mission in 1855, his brother William being among those who were killed by the Indians while on that expedition. He moved from Eprhaim to Spring City and from there to Circle valley and then again to Spring City, where he remained and made his permanent home. He was a typical ploneer and frontiersman. He was a leader in the ploneer days and has been a builder, a worker a useful citizen from then until the day of his death, which occurred at his home in Spring City on Friday, Jan. 14, 1910, after three days' illness, pneumonia being the cause of his death. He was an energetic and faithful member of the Church during all of the 70 years of his membership. The last time he spoke in public was at the exercises held in the ward on Dec. 26, last, in commemoration of the birth of the Prophet Joseph Smith. On that occasion he bore a fervent and earnest testimony to the divinity of the mission of the Prophet Joseph Smith. On that occasion he breaf necessaries and faithful member of the Church during all of the 70 years of his membership. The last time he spoke in public was at the exercises held in the ward on Dec. 26, last, in commemoration of the birth of the Prophet Joseph Smith. On that occasion he bore a fervent and earnest testimony to the divinity

FARMERS AND HOUSEKEEPERS SCHOOL A SUCCESS

EMPRAIM, Sanpete Co., Jan. 17;-The Farmers and Housekeepers' school held at the Snow academy, Ephraim

teid at the Snow academy, Ephraim, Sanpete county, during the past week was an educational success. The faculty of the Snow academy held half-hour classes, so that the en tire school could take advantage o such an excellent opportunity, which was greatly appreciated by the entire school. Much good was done in the way of encouragement to the young to enter into the work of the new edu-cation. It was plainly shown that the old time farmer was rapidly being replaced by the new, and the day has passed when unscientific methods

ing replaced by the new, and the day has passed when unscientific methods can succeed.

The following instructors were present: Prof. George M. Turpin, Prof. S. H. Goodwin, Dr. Robert Stewart, Prof. M. A. Merrill, Mr. Jacob Magleby, Prof. Lewis A. Merrill, Miss Love, President Paxman, J. Edward Taylor, state horticultural inspector, Dr. John A. Widtsoe, president of the Agricultural college, and Mr. William Tobias, Each instructor talked along his special line of work, thus giving the people the benefit of specialization, experience and investigation along the varied lines of agriculture and the conservation of natural resources.

The academy orchestra furnished music at each session during the week which was highly appreciated and made the work more interesting.

The work closed Friday evening, followed by a dance in the large assembly hall in which students, friends and visitors participated. Between the afternoon and evening sessions on Friday, Miss Anderson the domestic science instructor in the Snow academy, gave a banquet in honor of the instructors of the farmers and househousekeepers' school, all the members of the faculty, President Henry Beal of the local educational board and several friends of the institution were present.
